

## Pro

## 4 Satellite Cascadable Multiswitch with 1 Terrestrial Input \& 16 outputs IDLP-SWT160-C0000-16B

Item: 5337

The Inverto $17 \times 16$ Cascadable Multiswitch is an easy to install multiswitch system supporting up to 4 satellite positions. A terrestrial input is available to allow both terrestrial as well as satellite signals to be available on all the 16 subscribers outputs. Switching satellite position is done via DiSEqC signals from the subscriber set-top box.

The Multiswitch is powered with an external AC/DC Power Supply adapter.

## Main Features:

- Fully modular and Cascadable

■ 4 satellite positions + Terrestrial input

- Connects up to 16 satellite receivers or TVs with Sat tuner
- High isolation between ports
- Built in amplifier to compensate cable losses
- DiSEqC2.0
- Easy to install, Color coded trunk inputs and outputs
