

Quarterly newsletter

Issue 01 / 2020

Dear Partners,

This is our first newsletter of what will become a quarterly issue. With this initiative, our intention is to keep you abreast of the developments inside the company, of the new products we are bringing to market, as well as of our presence at trade shows or special events we may attend. And of course, when the occasion arises, of special offers we make on certain of our products. We hope you will find this newsletter informative and count on your feedback to improve it as needed.

ANNOUNCEMENTS

FTA Communication Technologies S.à.r.l. (FTA) is pleased to announce the appointment of Olivier Demoly as Sales and Marketing Director of FTA. Olivier brings extensive industry experience and product development acumen to the team from his years with Sagem, NXP and more recently Neotion/SmardTV. Please join us in welcoming Olivier to the Inverto family.

AngaCOM 2020

FTA will be exhibiting at AngaCOM 2020 with a whole range of new products including:

- A technologically-advanced Mesh Wifi solution that will solve all in-home connectivity issues (more on this in the next iteration of this Newsletter)
- A range of EDFAs and video-over-fiber products
- A new offering in the hospitality segment with our new airScreen tality™.

If you plan on attending ANGA 2020, please be sure to pre-book an appointment with your account manager, or use the link below so you can have the opportunity to hear about our new product range and future ambitions.

Anga 2020, 12 –14 May
Inverto - Hall 8, Stand T20

airScreen Tality™

Conceived to address the unique needs of hotels, schools, hospitals and MDUs, airScreen tality™ offers the flexibility, reliability and features required to deploy a secure CATV and/or IPTV solution simply, quickly and at an affordable budget.

The convenient 4 RU package can host up to 16 hot-swappable modules to address the full range of functionalities required to deliver video over coax or IP networks including receiving, de-scrambling, encoding, multiplexing, re-scrambling and modulating a Transport Stream over QAM, OFDM or IP.

For smaller scale deployments, a 1 RU solution with up to 6 hot-swappable modules can be used.
