

Luxembourg, Paris, September 27th 2023

Inverto (FTA Communication Technologies SARL) announces the acquisition of Quadrille Ingénierie SAS

Inverto, is a the leading supplier of broadcast reception equipment and video streaming solutions serving major DTH operators across the world. Inverto leverages strong R&D and software capabilities and has secured a leading position in a host of new breakthroughs technologies including Ka/Ku Co-locate LNBS, dCSS, SAT>IP (IP-LNB), multiscreen video streaming, WebRTC and more recently DVB-Native IP.

Quadrille is a French independent software and service provider, and a leader in delivering content over-the-air. Quadrille's innovative push technology answers the real-lifie needs of media, entertainment, transportation, public, and military infrastructures.

Both companies are pleased to announce they have agreed on the acquisition by Inverto of 100% of the shares of Quadrille and are about to engage in the merging of their activities.

Commenting on the acquisition, Christophe Perini, CEO at Inverto, said: “the Quadrille technology complements and advances our solutions portfolio in the content delivery segment. Our shared vision is to be our customers’ preferred connectivity partner through cutting-edge technological leadership. We will combine our complementary solutions, strong R&D foundation and above all customer-focused values to connect our clients to the future”.

Xavier Battas, CEO of Quadrille added: “this strategic alliance is a very important milestone in our strategy towards a customized digital platform of audio-visual solutions and services. Diversifying services by delivering multicast content over a broadcast network is essential for operators to remain competitive. The end-to-end mABR and DVB-NIP compliant solution our combined entities offer, not only delivers game-changing features, but the solution also fits with our company values of being environmentally conscious”.

Quadrille will continue operating from its Paris-based headquarters.

About Inverto

Inverto is a leading supplier of broadcast reception equipment and video streaming solutions serving major DTH operators across the world. Inverto leverages strong R&D and software capabilities and has secured a leading position in a host of new breakthroughs technologies including Ka/Ku Co-locate LNBS, dCSS, SAT>IP (IP-LNB), multiscreen video streaming and WebRTC.

About Quadrille:

Quadrille is a software leader in multicast content delivery. Our products support any type of content over-the-air using any broadcast network including, satellite, terrestrial, and cable.

Our innovative technology meets the needs of Pay-TV Operators, satellite operators, the military, humanitarian organizations, education, and transport infrastructure.

We are conscious of the environmental impact of OTT solutions. We work to reduce the negative impact on the environment by collaborating with hardware manufacturers and network operators to develop sustainable solutions. We pride ourselves on offering the most eco-conscious solutions that are also highly efficient, helping operators reduce their carbon footprint and achieve their sustainability goals.
